## **Background study / Latar Belakang kajian**

Give general overview of the research background e.g. Government initiatives, WHO, UNESCO, Policy..., SDG goals that relates to your study

Images, infographics, grafts,

## Problem statement

Motivational Problems / Motivasi kajian

What motivates you to start this research?

(non-scientific)

GAP 1 / Jurang

What's the gap in the field?

No guideline, No S.o.P, no framework

Research Problems / Masalah kajian

What has been discussed currently in the literature about this topic?

(scientific)

Gap 2 / Jurang

What's the gap in the literature?

Current model only limited to .....

P.O.D / AIM  
Therefore....

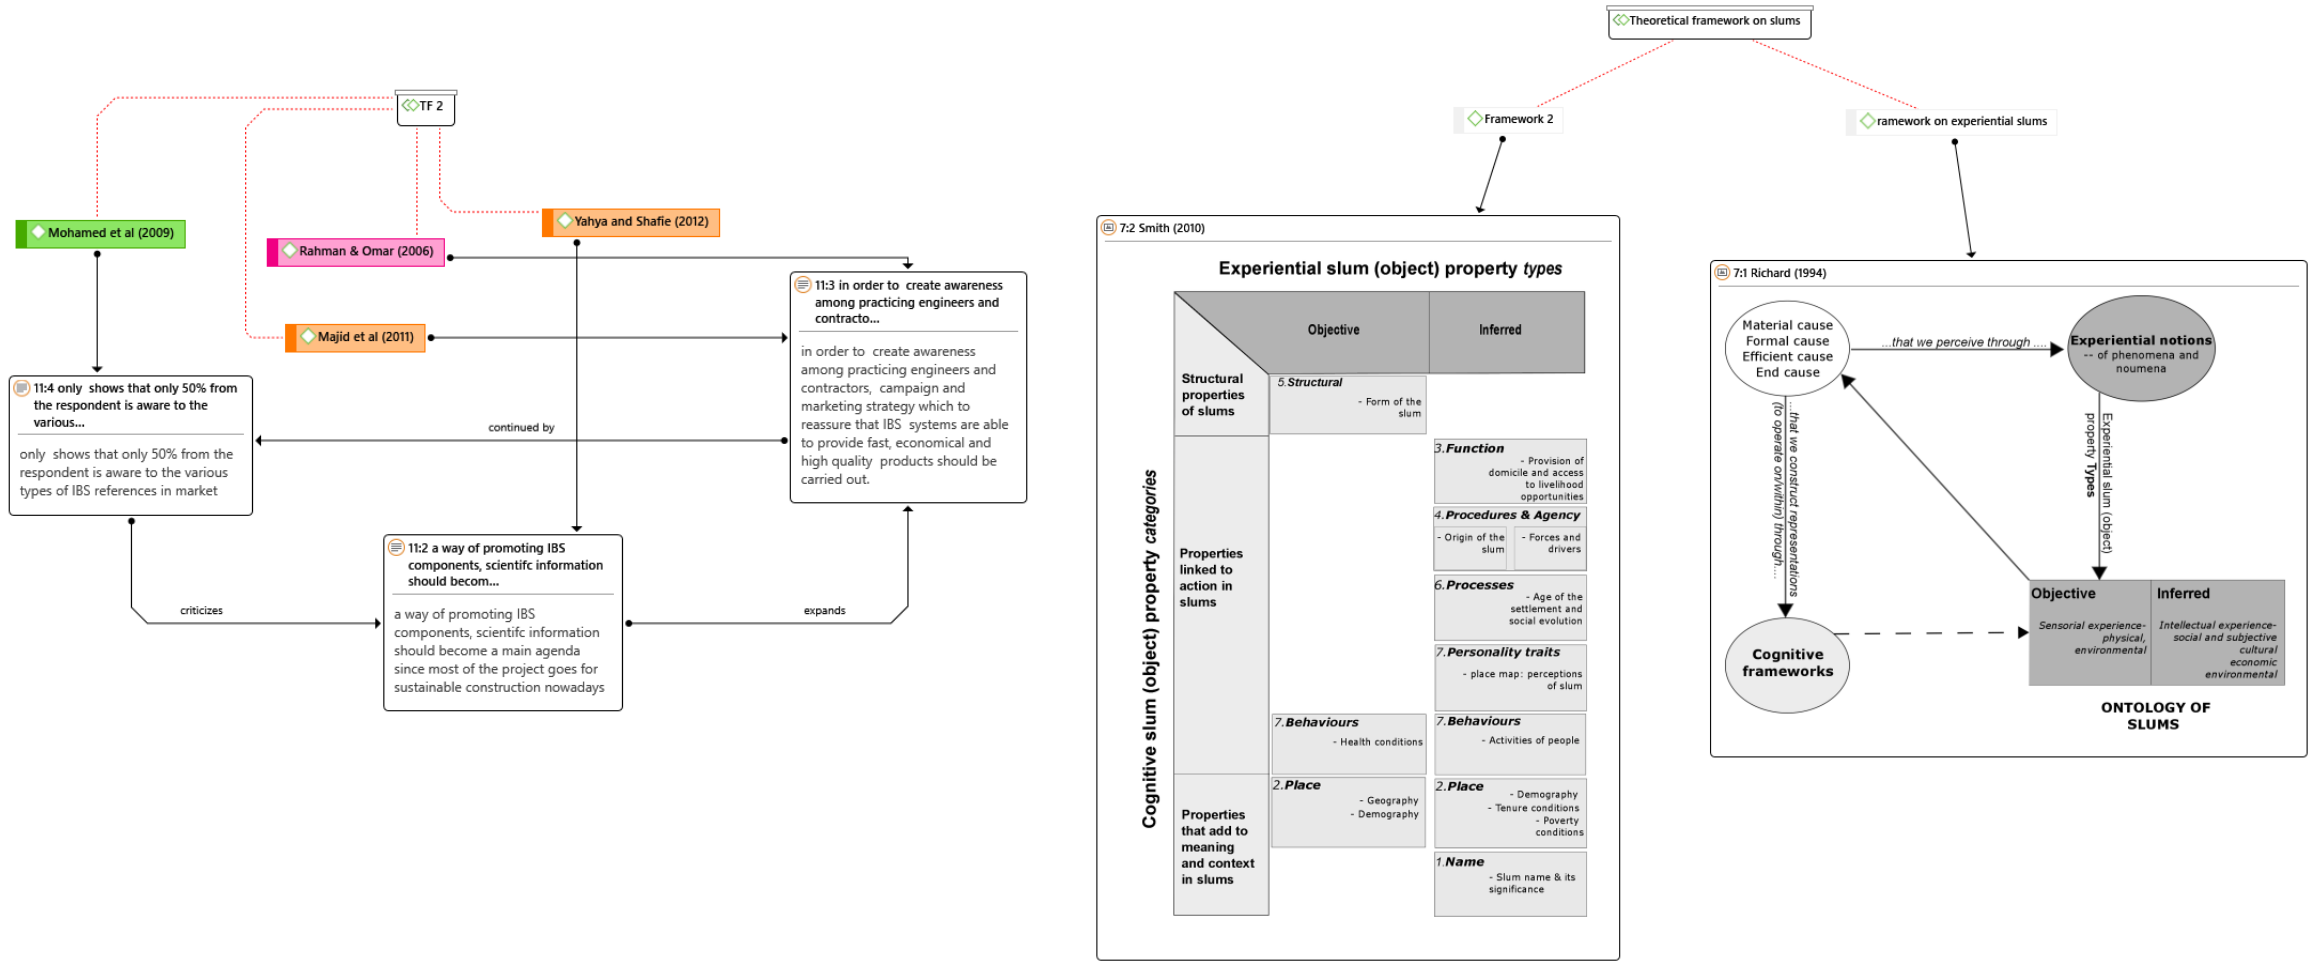

## Analytical Framework / Operationalized Framework

Main Research Questions			
Research Questions	Research Objectives	Deductive (Quali) Variables (Quantl	Strategy of Inquiry
Sub RQ 1 What is the method and technique that can be used to teach Malay adult to understand Al-Quran?	Objective 1 <b>To identify</b> the method and technique that can be used to teach Malay adult to understand Al-Quran?	Teaching method and technique Al-Quran	Desk review  Archival analysis  Document analysis
Sub RQ 2 Adakah terdapat perbezaan signifikan antara kumpulan sokongan Telegram dan efikasi sendiri utk pascasiswazah?	Objective 2 Mencari perbezaan signifikan antara kumpulan sokongan Telegram dan efikasi sendiri utk pascasiswazah	Support group AND postgraduate	Questionnaire
Sub RQ 3	Objective 3		

# Literature Review

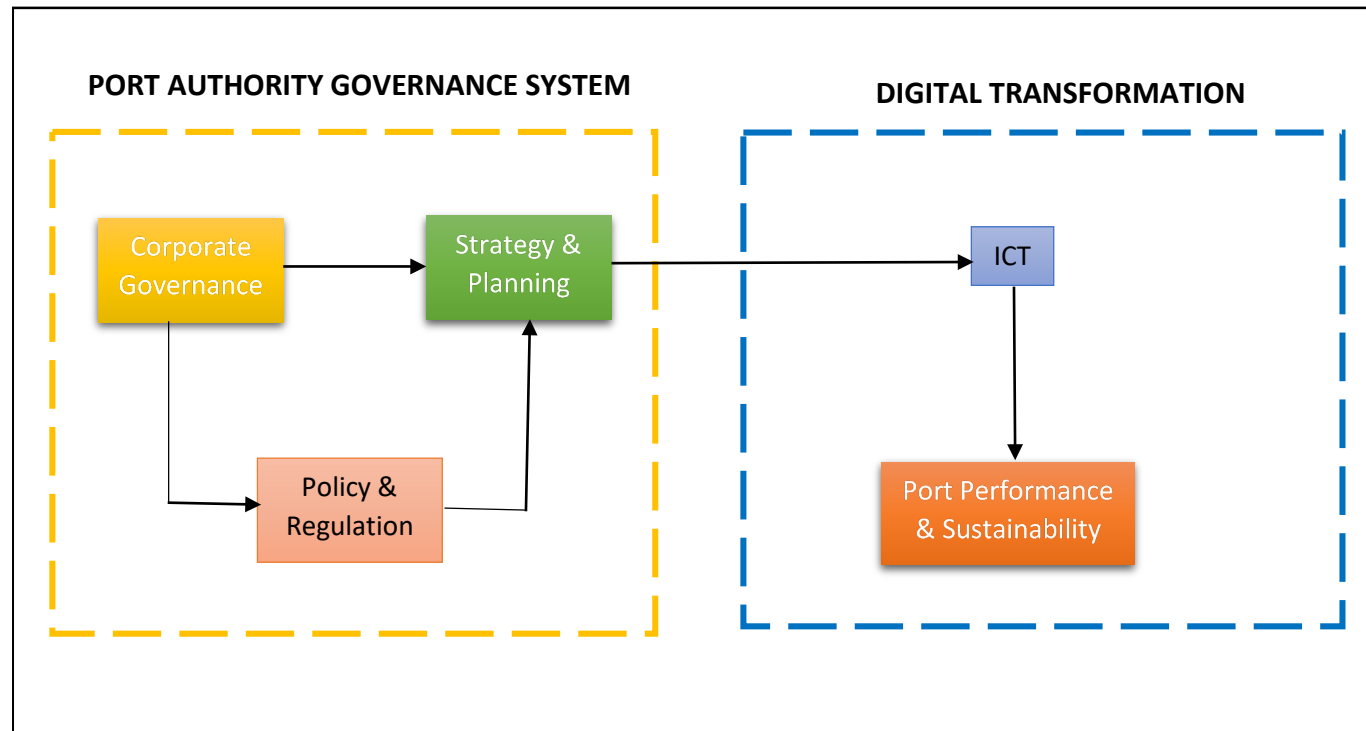

Document	Background study	PS	GAP	P.O.D	Methodology	Results	Remarks
Adnan (2019)	Construction joint ventures in Malaysia are become increasingly popular both with local and foreign companies in order to achieve their individual objectives	The contractors need to know the success factors, which were consider critical for their JVs to be successful.	Even though IBS has been introduced in Malaysia over a decade ago, until today most of the IBS project is still based on the traditional construction project	This paper aims to identify the success factors of joint venture projects among IBS contractors in Malaysia.	Questionnaires were distributed to 200 IBS contractors registered under the Construction Industry Development Board (CIDB) in Malaysia with fifteen percent (15%) replied	It was found that there were nine (9) factors of success which were experienced workforce and technical capability, skilled labour for site installation, good working collaboration, coordination of design, manufacture and construction, effective communication channel and close relationship with suppliers or contractor	This study is lacking in term of bla bla bla
Abdul Khalil (2016)	Industrialised Building System (IBS) has been identified as a potential method to improve overall construction performance in term of quality, cost effectiveness, safety and health, waste reduction and productivity	There are several issues in managing IBS construction projects which lead to delays, poor qualities and cost overrun	However, due to shortcoming of local skilled workers and overflow of unskilled workers from the neighboring countries, in 1999 country has recognised and enforcing use of IBS as one way of overcoming the problems	This paper aims to analyze the issues in managing the construction phases of IBS projects	The construction industry has started to embrace IBS as a method of realizing better construction quality and productivity	Based on this review, it shows that less effective use of IBS in Malaysia construction industry is due to unwillingness of the players to change from conventional system because they are not convinced with the IBS system	This only
